PVX Mounting Systems®
THE STANDARD IN CABLE MANAGEMENT

WITH YEARS OF EXPERIENCE IN THE PV INDUSTRY

PVX Mounting Systems develops and manufactures (100% made in Holland) tube, mesh tray and M8 application mounting systems for flat roofs, slope roofs, walls. With a huge passion for cable management and a clear mission to become 'the standard in cable management', the foundation for the company has been laid. Choosing PVX Mounting Systems® means choosing innovation, product quality, customer focus and sustainability.

WIND CERTIFICATION

All our mounting systems have been tested by the independent consultancy firm Peutz BV (equipped with its own wind tunnel) in accordance with all applicable standards. Having wind tunnel tests performed provides us with precise insights to prevent any shifting, lifting, or tilting our mounting systems.

The results of the wind tunnel studies are compiled into an internal calculation tool, enabling us to calculate every project involving mesh tray, tube or M8 applications. This applies equally to projects installed outside the Netherlands.

Quality is and will always be a choice!

Certificates
